

For our headquarter in **Krailling near Munich**, we are looking for you as:

Commissioning Engineer for Laser and Automation Technology – m/w/d

You have the expertise and want to become a long-term part of our dynamic environment? Then we look forward to receiving your meaningful application, including your earliest possible start date and salary expectations, preferably by email.

Your Tasks:

- Technical commissioning of our laser systems at the Krailling site
- Commissioning and testing of PLCs, drive systems, laser systems, and peripheral devices, including independent error analysis and adjustment of hardware and software
- Close collaboration with the technical departments for the continuous improvement of our systems
- Setting and optimizing laser processes in cooperation with the application department
- Conducting acceptances, training sessions, and workshops with our end customers

Your Profile:

- Completed vocational training as a mechatronics technician or similar
- Further training to become a state-certified technician is desirable – we are happy to support this, for example, as part of dual further education or with financial participation in evening/weekend classes
- Experience with programmable logic controllers, ideally TwinCat
- Knowledge in the fields of automation technology, electrical drives, and special machine construction is advantageous
- Ability to work independently and take responsibility for tasks
- Willingness to travel (approximately 15%)
- At least good German and English language skills, both spoken and written

Why us?

Why us? We offer you a role with diverse, responsible, and exciting challenges at a growing medium-sized technology leader. Our machines and their applications contribute to sustainability and actively support the rapid implementation of the energy transition. Together with our long-standing and international customers, they are continuously being developed. Here you will find a working environment where competence, experience, innovation, and high quality standards are paired with enjoyment, modern work tools, flat hierarchies allowing room for your own ideas, and a workplace surrounded by greenery, easily accessible by car, bike, or public transport. A personal contact person and a friendly team will support you during your onboarding and afterwards.

Our Benefits:

- Flexible working hours, no shift work
- 30 days of vacation, additional special leave for certain occasions
- Team events and company celebrations (summer party, Oktoberfest visit, Christmas party, etc.)
- Subsidy for childcare, fuel vouchers, free e-charging stations, employee discounts
- Free parking spaces
- And of course, free water, coffee, and fruit

We don't just offer you a job, but a place for passionate development and personal growth. Exciting challenges, a warm working environment, and almost limitless opportunities for development await you here. Welcome to our dedicated, global team!
